LETTERS TO THE EDITOR

Low-temperature resistivity of silver

- | | |
|---|---|
| <i>M Khoshnevisan, W P Pratt Jr, P A Schroeder, S Steenwyk and C Uher</i> | L1 |
| Copper-iron alloys: iron moment and lattice distortion | J R Davis and T J Hicks L7 |
| Influence of longitudinal and transverse magnetoresistivity on nuclear acoustic resonances in aluminium | V Müller, E J Unterhorst, D Maurer and G Schanz L11 |

PAPERS

- | | | |
|---|---|-----|
| Anisotropic thermal expansion in the divalent HCP metals | M Hasegawa, M J Stott and W H Young | 1 |
| A diffraction study of a release of energy during the annealing of aluminium | C J Martin and D A O'Connor | 21 |
| Mössbauer spectroscopy of isotope separator implanted ^{119m}Sn in FCC metals | A N Larsen and G Weyer | 27 |
| Crystal dynamics of Pt_3Mn at 80 K | D McK Paul, R A Cowley and B W Lucas | 39 |
| Virtual bound states in dilute noble metal based disordered alloys according to the resonant model potential theory | L Dagens | 45 |
| Plasmon loss and plasmon gain in Mg-Cd alloys | S A Abo-Namous, P T Andrews and C E Johnson | 61 |
| Validity of empirical expressions for the low-temperature electrical resistivity | M Kaveh, C R Leavens and N Wiser | 71 |
| Density of electronic states in amorphous and liquid cobalt | S N Khanna, F Cyrot-Lackmann and M C Desjonquères | 79 |
| Thermoelectric power near the critical point of expanded fluid mercury | F E Neale and N E Cusack | 85 |
| The Fermi surface of rhenium: radiofrequency size effect | T L Ruthruff and R G Goodrich | 95 |
| van der Waals interaction in bimetallic junctions | R Mehrotra and J Mahanty | 107 |
| Some observations of thermodynamic and electron transport properties in expanded liquid mercury and amalgams | F E Neale, N E Cusack and R D Johnson | 113 |
| The Einstein temperature of itinerant ferromagnets | C M Sayers | 123 |
| The Kondo effect in highly concentrated magnetic alloys | K Hoshino and Y Kurata | 131 |
| Magnetic intermediate valence behaviour in the series $(\text{Ce}_x\text{La}_{1-x})\text{Be}_{13}$ | J P Kappler and A Meyer | 143 |
| Magnetic after-effect in the bulk amorphous alloy $\text{Tb}_{52}\text{Ag}_{48}$ | B Boucher and B Barbara | 151 |

NO 2 FEBRUARY 1979

LETTERS TO THE EDITOR

- | | | |
|--|--|-----|
| The hard-sphere model for the surface entropy of liquid metals | T Itami and M Shimoji | L15 |
| Some properties of ion-implanted Li in Be | M S Duesbery and R Taylor | L19 |
| Lattice location study of ^6Li implanted into Be | E N Kaufmann, R Vianden, T E Jackman, J R MacDonald and L G Haggmark | L23 |
| Electrical resistance anomalies of highly resistive crystalline alloys | R Cywinski | L29 |
| The absolute thermopower of lead below 17 K | R S Crisp, A J Sharp and S J Song | L35 |
| On the spin-wave theory of an amorphous asperomagnetic alloy | T Kaneyoshi | L37 |
| UPS investigation of Fe single crystals | A Schulz, R Courths, H Schulz and S Hufner | L41 |

PAPERS

- Structure and dynamics of a two-component metallic glass *L von Heimendahl* 161
- Equilibrium vacancy concentration measurements on zinc single crystals *R Balzer and H Sigvaldason* 171
- Thermodynamic properties of solid alloys: II. Order-disorder transitions in Mg_3Cd and $MgCd_3$ *C H Leung* 179
- Heat capacity and magnetisation of gold-nickel alloys *R Kuentzler and J P Kappler* 195
- Volumes of mixing of liquid metals *I Yokoyama, M J Stott, M Watabe, W H Young and M Hasegawa* 207
- Magnetoplasma waves in bismuth and semimetallic BiSb alloys in strong magnetic fields at 300 GHz *W Braune, J Lebeck and K Saermark* 223
- Local density of states of a bulk Cu atom *C E van Dijkum and A Lodder* 243
- Single-particle Hamiltonian and self-consistency in random binary alloys *F Sacchetti* 253
- de Haas-van Alphen effect, LMTD bandstructure and Fermi surface of β -AuMg *A E Dunsforth, J-P Jan and H L Skriver* 261
- Electronic structure of dilute $Fe_{1-x}P_x$ alloys *M Maurer, M C Cadeville and J P Sanchez* 271
- Self-consistent LMTD band calculations on Al5 compounds *T Jarlborg* 283
- Density of states and electrical conductivity of disordered alloys with strong electron correlation *K Elk, J Richter and V Christoph* 307
- Hall resistivity of a two-phase magnetic material—crystallised Metglas 2826 *R Malmhäll, G Bäckström, S M Bhagat and K V Rao* 317
- Electrical and optical properties of CoP metallic glasses *J Rivory and B Bouchet* 327
- Dynamic magnetic susceptibility of a binary ordered ferromagnetic alloy. Application to spin wave stiffness constant of FeRh *R Riedinger, M C Mokrani, H Dreyse and M A Khan* 337
- Magnetic and transport properties of nickel-rare earth amorphous alloys *R Asomoza, I A Campbell, A Fert, A Liénard and J P Rebouillat* 349
- Electron spin resonance in $Gd, Y_{1-x}Ir_x$ *L B Chiu, P R Elliston, A M Stewart and K N R Taylor* 373
- Mössbauer studies of aging and precipitation in CuFe *P E Clark, J M Cadoogan, M J Yazchi and S J Campbell* 379
- On the behaviour of the Cd d bands in Au, Ag and Hg alloys *J A Nicholson, R C G Leckey, J D Riley, J G Jenkin and J Liesegang* 393

NO 3 MARCH 1979

LETTERS TO THE EDITOR

- On the magnetic behaviour of $Y(Fe, Al_{1-x})_2$ alloys *E Burzo, R Baican and P Armas* L47
- Frequency dependence of the local field factor of an electron liquid *B K Rao, S S Mandal and D N Tripathy* L51
- On the origin of the large magnetic anisotropy of rare earth-cobalt compounds *B Szpunar and P A Lindgård* L55

PAPERS

- Thermodynamic properties of liquid Na-Ga alloys *S Tamaki and N E Cusack* 403
- The use of long-range metallic pair potentials in computer simulations *M S Duesbery, G Jacucci and R Taylor* 413
- A review of twin and stacking fault energies in Al, Mg and Be *J P Simon* 425
- The specific heat of strained and annealed chromium *I S Williams, E S R Gopal and R Street* 431
- End effects for a one-dimensional alloy *L Billard, P Villemain and A Chamberod* 447
- Band theory of nonmagnetic and magnetic iron-rhodium alloy *M A Khan* 457
- The electronic structure of dilute alloys of gallium in gold *P T Coleridge* 473
- Virtual bound states in dilute copper-transition metal alloys *E M Haines* 485
- Electron-electron scattering effects in metals *C Potter and G J Morgan* 493
- Calculation of the electrical resistivity of liquid rare earths: I. The divalent elements Eu, Yb *B Delley, H Beck, D Trautmann and F Rösler* 505

Calculation of the electrical resistivity of liquid rare earths: II. Trivalent elements	
	<i>B Delley and H Beck</i> 517
Ultrasonic attenuation studies in the intermediate state of pure and doped type I superconductors	
	<i>K D Chaudhuri and S K Agarwal</i> 529
Magnetic order and coupling in Heusler alloys $\text{Au}_2(\text{Mn}, \text{Z})_2$	<i>J S Plant</i> 545
Stiffness constant of strong ferromagnetic Ni-based alloys, measurements in NiCo—interpretation within band models	<i>B Hennion and M Hennion</i> 557
Interconfiguration fluctuation of cerium in CeN as a function of temperature and pressure	<i>G L Olcese</i> 569
Electronic structure of metals: VII. Optical adsorption of simple metals	<i>S Wang and C B So</i> 579
Simple calculation of optical absorption of Ni in the near infrared	<i>J C Parlebas and D L Mills</i> 591

NO 4 APRIL 1979

LETTERS TO THE EDITOR

Neutron diffraction study of γ -iron titanium deuteride	
	<i>P Thompson, J J Reilly, F Reidinger, J M Hastings and L M Corliss</i> L61
Vacancy—scandium interaction in quenched copper	<i>A S Berger and R W Siegel</i> L67
Electronic states in amorphous and liquid iron	<i>T Fujiwara and Y Tanabe</i> L73
Critical behaviour of the electrical resistivity at the spin-reorientation transition of pure gadolinium	
	<i>J B Sousa, M M Amado, P R Pinto, J M Moreira, M E Braga, M Ausloos and P Clippe</i> L77
Conduction electron surface scattering phase shift in lead	<i>A A Cottley</i> L83
The Néel temperature of the Cr—Ga alloy system in the dilute concentration range	<i>K Fukamichi</i> L85

PAPERS

The HCP—FCC transition in pure Co investigated by neutron scattering	
	<i>F Frey, W Prandl, J Schneider, C Zeyen and K Ziebeck</i> 603
The polyhedron and cavity analyses of a structural model of amorphous iron	
	<i>R Yamamoto and M Doyama</i> 617
On H (and He) impurities in Al and Mg	<i>M D Whitmore and J P Carbotte</i> 629
A positron trapping study of molybdenum irradiated with 2, 10, and 40 MeV electrons	
	<i>M Eldrup, B T A McKee and A T Stewart</i> 637
Crystal fields in TmCu_5	<i>K Knorr, W Gross, J F Olijhoek and K H J Buschow</i> 645
Measurements of the heat capacity of neodymium in the range 2–10 K and zero magnetic field	
	<i>E M Forgan, C M Muirhead, D W Jones and K A Gschneidner Jr</i> 651
Linear augmented plane wave method for self-consistent calculations	<i>T Takeda and J Kübler</i> 661
Electronic structure of intermetallic compounds with CsCl structure: NMR relaxation times	
	<i>B Perrin, P Descouts, A Dupanloup and D Seipier</i> 673
Relativistic energy bands of indium by RKKRZ method	<i>J Chowdhuri, P Chatterjee and S Chatterjee</i> 683
Indication of an electron redistribution in the d band of Fe alloyed with Si	
	<i>F Dupré, G Frollani, F Menzinger and F Sacchetti</i> 691
General criteria for ferromagnetism in the Hubbard model	<i>A E K Dowson</i> 705
Basis of the Landau—Ginzburg theory for inhomogeneous ferromagnetic systems	
	<i>D Wagner and E P Wohlfarth</i> 717
NMR evidences for Kondo deviations of the Mn electron spin relaxation and g factor in CuMn	
	<i>H Alloul, F Hippert and H Ishii</i> 725
On the magnetic properties of $\text{Gd}(\text{Fe}_{1-x}\text{Al}_x)_2$ compounds	<i>M J Besnus, A Herr and G Fischer</i> 745
Spin correlations in a spin glass	<i>J R Davis and T J Hicks</i> 753

NO 5 MAY 1979

LETTERS TO THE EDITOR

Tight-binding theory of alloy heats of formation: a moments approach	<i>C H Hodges</i> L89
--	-----------------------

The coexistence of spin density wave ordering and spin glass ordering in chromium alloys containing iron	<i>J O Strom-Olsen, D F Wilford, S K Burke and B D Rainford</i>	L95
Density-functional approximation for the quasiparticle dynamics of Rb	<i>A H MacDonald</i>	L99
The low-temperature lattice conductivity and phonon drag thermopower of potassium	<i>M R Stinson, R Fletcher and C R Leavens</i>	L107

PAPERS

Magnetic properties and spontaneous distortion in TiCO_2	<i>D Gignoux, F Givord, R Perrier de la Bathie and F Sayetat</i>	763
Pressure derivatives of the elastic moduli of bcc Ti-V-Cr, Nb-Mo and Ta-W alloys	<i>K W Katahara, M H Manghnani and E S Fisher</i>	773
Solubility of helium in metallic hydrogen	<i>D J Stevenson</i>	791
Low-temperature specific heat of glassy and crystallised $\text{Pd}_{0.775}\text{Cu}_{0.06}\text{Si}_{0.165}$ alloys	<i>J C Lasjaunias, A Ravex and D Thoulouze</i>	803
Linear methods for fully relativistic energy-band calculations	<i>T Takeda</i>	815
Stress induced changes in the Fermi surface of magnesium	<i>B R Watts and J Mayers</i>	831
An analytic method for calculating stress induced changes in Fermi surfaces: II	<i>B R Watts and L J Sundström</i>	849
On the theory of the electrical conductivity of disordered systems in the tight-binding approximation	<i>B Movaghar and G W Sauer</i>	867
Long-range order and the electrical resistivity	<i>P L Rossiter</i>	891
Study of subharmonic gap structures in both symmetric and asymmetric superconducting tunnel junctions based on oxidised PbIn alloy electrodes	<i>P Mukhopadhyay</i>	903
Magnetic susceptibility of AuFe alloy films	<i>G Zibold</i>	917
ac susceptibility and temperature modulation studies of gadolinium	<i>G H J Wantenaar, S J Campbell, D H Chaplin, T J McKenna and G V H Wilson</i>	935
A study of the influence of a deformation on a shape of the Mössbauer spectrum of iron-chromium alloys	<i>S M Dubiel, T Wrześniewska and S Gorczyca</i>	949
Structural and magnetic properties of $\text{Gd}(\text{Co}_{1-x}\text{Ir}_x)_2$	<i>L B Chiu, P R Elliston, A M Stewart and K N R Taylor</i>	955
Phonon characterisation and the theory of the temperature dependence of the electrical resistivity of amorphous metals	<i>J Jäckle and K Froböse</i>	967

NO 6 JUNE 1979

LETTERS TO THE EDITOR

On the (1 1/2 0) superlattice reflection in $\beta\text{-PdD}_x$	<i>O Blaschko, R Klemencic, P Weinzierl and O J Eder</i>	L113
Further evidence for electron-electron scattering in aluminium	<i>J H J M Ribot, J Bass, H van Kempen and P Wyder</i>	L117
The Curie temperatures of compounds of the heavy rare earths and yttrium with cobalt	<i>E P Wohlfarth</i>	L123
Low-temperature specific heat of the 'nearly ferromagnetic' amorphous alloy $\text{Y}_{0.32}\text{Ni}_{0.78}$	<i>P Garoche, A Liénard, J P Rebouillat and J J Veysie</i>	L129

PAPERS

Small angle neutron scattering on liquid Ag-Ge alloys	<i>M-C Bellissent-Funel, M Roth and P Desré</i>	987
Positron annihilation and Mössbauer studies on $\text{Cu}_x\text{Zn}_{1-x}$	<i>I Dézsi, A Balogh, J Balogh, Zs Kajcsos, D L Nagy and E Zsoldos</i>	99
The thermal pressure coefficients and heat capacities of simple liquid metals	<i>J M Harder, M Silbert, I Yokoyama and W H Young</i>	1005
Calculation of atomic displacements near the solute atom and in the asymptotic range in dilute alkali alloys	<i>G Solt and A P Zhernov</i>	1013
Measurement of the monovacancy formation enthalpy in copper	<i>A S Berger, S T Öckers and R W Siegel</i>	1023

Effect of hydrogen on the mechanical properties of Pd	<i>H Hasegawa and K Nakajima</i>	1035
Influence of many-electron exchange and correlation effects on the vibrational properties of substitutional alloys	<i>G Grünewald and R Schöphol</i>	1047
Investigation of the hydrogen diffusion in FeTiH _x by means of quasielastic neutron scattering	<i>E Lebsanft, D Richter and H Töpler</i>	1057
Analysis of LMTD band results for Al ₁₅ compounds by pressure calculations	<i>T Jarlborg</i>	1065
De Haas-van Alphen effect and LMTD bandstructure of Al ₂ Cu	<i>A E Dunsworth, J-P Jan and H L Skriver</i>	1077
Electronic states in amorphous metals	<i>T Fujiwara and Y Tanabe</i>	1085
Linear response function of a bounded jellium metal in the RPA	<i>L M Garrido, F Flores and F García-Moliner</i>	1097
Magnetic properties of AuCo solid solutions and frequency dependent susceptibility maximum	<i>D Korn, D Schilling and G Zibold</i>	1111
Mössbauer effect study of Pd-based Heusler alloys: I. Magnetic coupling	<i>J D Rush, C E Johnson, M F Thomas, D C Price and P J Webster</i>	1129
Mössbauer effect study of Pd-based Heusler alloys: II. Hyperfine interactions in ferromagnets	<i>J D Rush, C E Johnson, M F Thomas, D C Price and P J Webster</i>	1145
Magnetisation and magnetoresistance of PdCr spin glasses	<i>R W Cochrane, J O Ström-Olsen and G Williams</i>	1165
Optical properties of amorphous SnCu and SnAu alloys	<i>D Korn and H Pfeifle</i>	1175
Dynamic screening of a core hole: I. Semiclassical model	<i>C Noguera, D Spanjaard and J Friedel</i>	1189
XPS core line asymmetries in the muffin-tin approximation	<i>R Schöpke, W John and E Mrosan</i>	1205

NO 7 JULY 1979

LETTERS TO THE EDITOR

Dislocation scattering and de Haas-van Alphen effect	<i>E Mann</i>	L135
Low-energy excitations of hydrogen and deuterium in LaNi ₅	<i>W Bühner, A Furrer, W Hölz and L Schlapbach</i>	L141

PAPERS

The structure factor of liquid nickel at 1873 K	<i>O J Eder, E Erdpresser, B Kunsch, H Stiller, M Suda and P Weinzierl</i>	1215
The potential caused by an impurity in a monovalent metal	<i>M A Ball and M S Farthing</i>	1223
Perturbed angular correlation study of Pd impurity configurations neighbouring the ¹¹¹ Cd probe atom in Cu host	<i>I J R Baumvol, M Behar, J A H da Jornada, E R Fraga, R P Livi and F C Zawislak</i>	1233
The effects of rare earth impurities on the oxidation of chromium	<i>R A Collins, S Muhl and G Dearnaley</i>	1245
Magnetic susceptibilities and specific heats of Ce-Th alloys	<i>R A Elenbaas, C J Schinkel and E Swakman</i>	1261
Specific heat, magnetisation and stability of canted structure in GdMg and related compounds	<i>J Pierre, A de Combarieu and R Laugier</i>	1271
Application of TDPAC techniques to diffusion models: diffusion mechanism of Ag in In	<i>A R Lopez-García, A G Babiloni, M C Caracoche, J A Martínez, L A Mendoza-Zélis, R C Mercader, A F Pasquevich and F Dymont</i>	1283
The bandstructure of rhodium, its groundstate and the effects of change of volume	<i>M Yahaya and G C Fletcher</i>	1295
Magnetic field dependent phase shifts present in the measurement of quantum oscillatory effects	<i>R Reifengerger and R W Stark</i>	1307
Theory for the L _{2,3} soft x ray appearance potential spectra for the 3d transition metals	<i>K Nuroh</i>	1321
Spherical solid model for muon and hydrogen in metals	<i>M Manninen and R M Nieminen</i>	1333
Theory of screening effects on crystalline electric fields in metallic rare earth materials	<i>J C Duthie and V Heine</i>	1349

A standard of thermopower for use in magnetic field	<i>B M Axan, M J O'Callaghan and P A Schroeder</i>	1357
The temperature dependence of metal work functions	<i>A Kiejna, K F Wojciechowski and J Żebrowski</i>	1361
Momentum dependence of effective Coulomb interaction on the magnetism of nickel	<i>B S Shastri</i>	1367
Field-dependent susceptibility of a spin glass	<i>M Simpson</i>	1377
Neutron diffraction studies of atomic and magnetic order in γ Mn alloys	<i>N Cowlam, G E Bacon, L Gillott, G R Harmer and A G Self</i>	1387
Polarised neutron study of TbCO_2	<i>D Gignoux and F Givord</i>	1409
Neutron study of the magnetic correlations in amorphous ErCO_2 : I. Evidence for correlations between local easy-magnetisation directions using neutron polarisation analysis	<i>B Boucher, A Lienard, J P Rebouillat and J Schweizer</i>	1421
Neutron study of the magnetic correlations in amorphous ErCO_2 : II. Evidence for two different regimes in small-angle neutron scattering	<i>B Boucher, A Lienard, J P Rebouillat and J Schweizer</i>	1433
Low-field susceptibility of PtFe alloys	<i>J C Ododo</i>	1441
Internal field distributions in model spin glasses	<i>R G Palmer and C M Pond</i>	1451
The incoherent phase transitions of hydrogen and deuterium in niobium	<i>H Zabel and J Peisl</i>	1461

NO 8 AUGUST 1979

LETTER TO THE EDITOR

On the apparent spin wave stiffness of amorphous ferromagnets	<i>M A Continentino and N Rivier</i>	L145
Corrigendum	<i>E Mann</i>	L151

PAPERS

Exact solution of the mean spherical approximation for a model liquid metal potential: I. Method of solution	<i>P T Cummings</i>	1477
The calculation of vacancy formation energies in the alkali metals Li, Na and K	<i>G Jaccuci and R Taylor</i>	1489
Vacancies and the electrical resistivity of potassium	<i>J G Cook, R Taylor and M J Laubitz</i>	1503
Vacancy recovery in heavy ion-implanted refractory bcc metals studied by Mössbauer spectroscopy	<i>S R Reintsema, E Verbiest, J Odeurs and H Pattyn</i>	1511
The electronic Grüneisen parameter for the transition metals	<i>G C Fletcher and M Yahaya</i>	1529
The calculation of electromigration forces and resistivities for liquid binary alloys	<i>W Jones and H N Dunleavy</i>	1541
The local density of states and the local environment in alloys	<i>J E Inglesfield</i>	1551
Stress-induced changes in the Fermi surface of zinc	<i>B R Watts and J Mayers</i>	1565
Double beam photoemission of d band metals: Rh, Pd, Ir, Pt	<i>M Wautelet, J P Delrue and L D Laude</i>	1579
Application of fast self-consistent cluster calculations for large systems to the electronic structure of solids	<i>G Ries and H Winter</i>	1589
Electrical and magnetic properties of the FeTi alloy near the order-disorder transition	<i>A Paja and K Kulakowski</i>	1613
Charge transfer and transport properties of binary alloys in the tight-binding model	<i>K Hoshino</i>	1619
Ohm's law violation in spin glasses	<i>A A Lisyanski and G I Trush</i>	1629
Plasmon dispersion in two-metal systems	<i>P Summerside</i>	1643
A numerical calculation of the orbital magnetic susceptibility for bcc 3d series transition metals	<i>M Yasui and M Shimizu</i>	1653
Characteristic magnetovolume effects in Invar type Fe-Pt alloys	<i>K Sumiyama, M Shiga, M Morioka and Y Nakamura</i>	1665
Effect of dilute Dy substitution on the Gd electron spin resonance in $\text{Gd}_{0.5}\text{Y}_{0.5}\text{Ir}_2$	<i>L B Chiu, P R Elliston, A M Stewart and K N R Taylor</i>	1679
High field magnetic measurements on $\text{Fe}_x\text{Ge}_{1-x}$ amorphous alloys	<i>O Massenot, H Daver, V D Nguyen and J P Rebouillat</i>	1687

The electric field gradient at ^{175}Hf nuclei aligned in a Lu single crystal at low temperatures	<i>H Ernst, E Hagn and E Zech</i>	1701
Optical properties of metastable CuFe solutions	<i>D Korn, H Pfeifle and G Zibold</i>	1709
Soft x ray emission and the local densities of states in Cu-Ni alloys	<i>P J Durham, D Gahle, B L Györfy, C F Hague, J-M Mariot, G M Stocks and W M Temmerman</i>	1719
Corrigendum	<i>C Potter and G J Morgan</i>	1731

NO 9 SEPTEMBER 1979

LETTERS TO THE EDITOR

Thermal volume expansion of liquid Ti, V, Mo, Pd and W	<i>U Seydel and W Kitzel</i>	L153
Measurement of the pressure dependence of the electron-phonon interaction in aluminium	<i>B Sundqvist and Ö Rapp</i>	L161
The alternating magnetisation of 16.7 at% CuMn	<i>E M Gray</i>	L167
The pressure dependence of the hyperfine field of tin dissolved in cobalt	<i>A E Balbanov and T E Cranshaw</i>	L173

PAPERS

Effects of order on the electronic structure of ferromagnetic transition metal alloys: application to FeCo and Ni_3Fe	<i>M C Desjonquères and M Lavagna</i>	1733
Contribution of the conduction electrons to the crystalline electric field. I: Direct coulombic part	<i>D Schmitt</i>	1745
Contribution of the conduction electrons to the crystalline electric field. II: Exchange coulombic part	<i>D Schmitt</i>	1759
Electronic structure of omega phase of titanium and zirconium	<i>Y K Vohra, S K Sikha and R Chidambaram</i>	1771
Electron-phonon collision frequencies in aluminium: the radio frequency size effect	<i>D Parsons and C A Steele</i>	1783
^{57}Fe Mössbauer study of hexagonal phase iron alloys	<i>D I C Pearson and J M Williams</i>	1797
Positron annihilation in gold between 27 K and 592 K	<i>L C Smedskjaer, M J Fluss, M K Chason, D G Legnini and R W Siegel</i>	1815
Electrical resistivity of amorphous alloy films: SnAu	<i>E Blasberg, D Korn and H Pfeifle</i>	1821
The magnetoresistance of aluminium	<i>M I Grossbard</i>	1833
Anisotropic electron scattering in Al and some Al-based alloys	<i>S P McAlister, C M Hurd and L R Lupton</i>	1849
Critical region of a type II superconducting film near H_{c2} : rational approximants	<i>G J Ruggeri</i>	1861
Environmental effects and magnetic moment distribution in nickel-rich Ni-Ru alloys	<i>G Parette and F Kajzar</i>	1867
The effect of impurities on the magnetic susceptibility of monovalent metals: I. The free-electron gas model	<i>M A Ball and M S Farthing</i>	1877
The effect of impurities on the magnetic susceptibility of monovalent metals: II. Fermi surface effects	<i>M A Ball and M S Farthing</i>	1883
Magnetic properties and Mössbauer effects of $\text{Zr}(\text{Fe}_{1-x}\text{Co}_x)_2$	<i>Y Muraoka, M Shiga and Y Nakamura</i>	1889
Magnetic properties of Fe_3Sn_2 : III. A ^{119}Sn Mössbauer study	<i>G LeCuer, B Malaman, L Häggström and T Ericsson</i>	1905

NO 10 OCTOBER 1979

LETTERS TO THE EDITOR

Positron annihilation study of vacancies in Cu-28at% Al-4at% Ni before and after martensitic transformation	<i>K Fukushima and M Doyama</i>	L177
---	---------------------------------	------

An expression for the integrated density of states of a liquid metal in Roth's effective-medium approximation. A generalisation of Friedel's formula	K Nitzeki	L185
Remanent superconductivity in pure bulk aluminium	R M Boysel, R S Newrock and J C Garland	L191
Influence of dislocations on the Mössbauer spectrum linewidth	S M Dubiel and P Korgul	L199

PAPERS

Energetics of the martensitic phase transition in sodium	M J Kelly	1921
On the origin of the Hume-Rothery rules for phase stability in α and β brasses	R Evans, P Lloyd and S M Mujibur Rahman	1939
Impurity-induced vacancy clustering in cold-worked nickel	G Dlubek, O Brümmer, N Meyendorf, P Hautajärvi, A Vehanen and J Yli-Kauppi	1961
Calculated energies and geometries for hydrogen impurities in Al and Mg	D S Larsen and J K Norskov	1975
Electron-phonon interactions in cadmium measured by inelastic neutron scattering	A A Chernyshov, V V Pushkarev, A Yu Rumyantsev, B Dörner and R Pynn	1983
Diffusion, correlation effects and jump frequency ratios in binary substitution solid solutions	Th Heumann	1997
Electronic states and transport in amorphous and liquid transition metals; Fe, Co and Ni	T Fujiwara	2011
Size effect in dilute alloys of transition metals	G Moraitis and F Gautier	2025
On the temperature dependence and magnitude of the electric field gradient in noncubic metals	K W Lodge	2035
Electronic properties of high-purity liquid calcium and strontium	C Rottman and J B Van Zytveld	2049
Anomalous resistivity associated with conduction-electron scattering from Cr impurities in Pt	R M Roshko and G Williams	2057
Planar defects in itinerant ferromagnets	B N Cox	2067
On the thermodynamics of weak-coupling superconductors	F W Kus	2081
On the observation of phonon structure induced into normal metals by proximity effects	Z Otadyahu and O Entin-Wohlman	2091
Influence of charge transfer on the crystal field in rare-earth chalcogenides and pnictides	R A B Devine	2107
Effect of ultrasonic pulses on the magnetisation of ferromagnetic precipitates in bismuth rich Bi-Mn	K Schröder and D Önençüt	2115
Magnetisation and magnetostriction of praseodymium	P Hendy, K M Al-Rawi, E W Lee and D Melville	2121
Magnitude of the microwave Faraday effect related to conduction electron spin resonance of lithium	Y Servant	2135
Soft x ray absorption and EXAFS on the K edge of aluminium	A Fontaine, P Lagarde, D Raoux and J M Estera	2143
Corrigendum		2155

NO 11 NOVEMBER 1979

LETTERS TO THE EDITOR

A neutron diffraction study of $\text{Fe}_{83}\text{B}_{17}$ metallic glass	N Cowlam, M Sakata and H A Davies	L203
The effect of hydrostatic pressure on the elastic constants of pure and hydrogenated single crystals of V and $\text{Nb}_{53}\text{Ta}_{47}$	H L Alberts, E S Fisher, K W Katahara and M H Manghnani	L209
A calorimetric investigation of emerging ferromagnetism in AuFe alloys	D G Dawes and B R Coles	L215
Transverse electron focusing and specular reflection in silver	V S Tsoi, J Bass, P A M Benistant, H van Kempen, E L M Payens and P Wyder	L221
Orbital magnetic susceptibilities of vanadium and iron	M Yasui and M Shimizu	L227
Two-dimensional angular correlation of positron-annihilation radiation in copper	S Wakoh, S Berko, M Haghighooie and J J Mader	L231

PAPERS

- Positive muon diffusion in iron
A Yaouanc, J F Dufresne, R Longobardi, J P Pezzetti, J Chappert, O Hartmann, E Karlsson and L O Norlin 2157
- Elastic moduli of paramagnetic chromium and Ti-V-Cr alloys
K W Katahara, M Nimelendran, M H Moughnani and E S Fisher 2167
- Dispersion relations for noble metals in the resonant model potential
J C Upadhyaya and L Dagens 2177
W Bendick and W Pepperhoff 2185
- Thermally excited states in cobalt and cobalt alloys
L Dagens and C Lopez-Rios 2195
- Thermodynamic properties of a metal near a Fermi surface topological transition: the anomalous electron-phonon interaction contribution
J Engelhard 2217
- The diffusion of H and D in Nb and Ta at low temperatures
B Delley and H Beck 2231
- Calculations of the electrical resistivity of liquid rare earths: III. Spin disorder contribution for Gd
I Ya Korenblit and E F Shender 2245
S K Kulsreshtha and P Raj 2253
- Spin waves in amorphous ferromagnets with random anisotropy axes
A Narayanasamy, T Nagarajan, P Muthukumarasamy and T S Radhakrishnan 2261
- Mössbauer studies of helimagnetic FeAs
R Rosei, S Modesti, V Prantera and I Davoli 2275
- Hyperfine field distribution in disordered binary alloys
P M Th van Attekum and J M Trooster 2287
- Shift of electronic states at L in α -phase Cu-Zn and Cu-Al alloys
P M Th van Attekum and J M Trooster 2287
- An x-ray photoelectron spectroscopy study of PbSb, PtBi and AuSn

NO 12 DECEMBER 1979

LETTERS TO THE EDITOR

- Neutron diffraction measurement of the structure factor of a CuTi metallic glass
M Sakata, N Cowlam and H A Davies L235
- Dislocation scattering: a new Hamiltonian for describing multivalued elastic displacement fields
R A Brown L241
- Nuclear acoustic resonance in palladium metal
B Ströbel, V Müller, D Schilling, K Läger and H E Bömmel L247

PAPERS

- X-ray finestructure study of manganese metal
A S Vaingankar, B V Khasbardar and R N Patil 2301
- Electron microscope image contrast from small dislocation loops: III. Theoretical predictions for non-edge dislocation loops in a BCC crystal
S M Holmes, B L Eyre, C A English and R C Perrin 2307
- Phonon dispersion relations for $\text{Pd}_{0.96}\text{Ag}_{0.04}$ single crystal
E Maliszewski, S Bednarski, A Czachor and J Sosnowski 2335
- Optical investigation of the solid-liquid transition in gallium
R Kofman, P Cheyssac and R Garrigos 2345
- On the determination of core and valence electron enhancement factors in positron annihilation studies
R P Gupta and R W Siegel 2353
- Angular correlation in positron annihilation
J Arponen and E Pajanne 2359
- Approximate expressions for the product of the resistivity with its TCR in very thin polycrystalline films
C R Tellier, C R Pichard and A J Tosser 2377
- Low-temperature transport properties of Pd-H alloys in a heterogeneous-mixture model
C L Foiles 2381
- The low-temperature thermoelectric properties of tin-doped bismuth
J Boxus, J Heremans, J-P Michenaud and J-P Issi 2387

Thermopower of tin-doped bismuth from 50 mK to 25 K	<i>C Uher</i>	2399
Spin glasses: pressure and concentration dependences of the resistivity of Au(Cr)	<i>J Willer, J Crone and E Lüscher</i>	2411
Inelastic neutron scattering measurements on incommensurate antiferromagnetic chromium	<i>K R A Ziebeck and J G Booth</i>	2423
The non-collinear component in the magnetic structure of Mn_4N	<i>D Fruchart, D Givord, P Convert, P l'Héritier and J P Sénateur</i>	2431
Magnetic excitations in Pt_3Mn	<i>D M K Paul and W G Stirling</i>	2439
The effects of pressure and crystallinity on the hexagonal to orthorhombic transition temperature in dysprosium	<i>R J Potton, K A Warburton and G J Keeler</i>	2451
Effective exchange interaction for rare earths in metals	<i>A Troper, O L T de Menezes and A A Gomes</i>	2457
Fano effect and hyperfine field of a non-transition impurity in ferromagnetic transition metals	<i>K Terakura</i>	2469
Nuclear magnetic resonance and pressure effects in $UNi_{5-5x}Cu_{5x}$	<i>K H J Buschow, P R Locher and M Leger</i>	2483
Optical constants of nickel: (I) influence of temperature, (II) relation to bandstructure	<i>M Ph Stoll and C Jung</i>	2491
On the x ray emission spectra from FeAl	<i>K Schwarz, A Neckel and J Nordgren</i>	2509
Corrigendum		2523
SUBJECT INDEX		2525
AUTHOR INDEX (with titles)		2545

Subject index

The 1979 subject index is based on the ICSU/AB International Classification for Physics; articles are listed, as appropriate, under one or more of the following headings:

- | | | | |
|--------|---|--------|--|
| 30.00 | ATOMIC AND MOLECULAR PHYSICS | 61.70T | <i>Doping and implantation of impurities</i> |
| 32.00 | ATOMIC SPECTRA AND INTERACTIONS WITH PHOTONS | 61.70Y | <i>Interaction between different crystal structure defects</i> |
| 32.80 | Photon interactions with atoms | 61.80 | Radiation damage and other irradiation effects |
| 32.80H | <i>Auger effect and inner-shell ionisation</i> | 61.80F | <i>Electrons and positrons</i> |
| 60.00 | CONDENSED MATTER: STRUCTURE, THERMAL AND MECHANICAL PROPERTIES | 61.80J | <i>Ions</i> |
| 61.00 | STRUCTURE OF LIQUIDS AND SOLIDS; CRYSTALLOGRAPHY | 62.00 | MECHANICAL AND ACOUSTIC PROPERTIES OF CONDENSED MATTER |
| 61.10 | X ray determination of structures | 62.20 | Mechanical properties of solids (related to microscopic structure) |
| 61.10D | <i>Theories of diffraction and scattering</i> | 62.20D | <i>Elastic constants</i> |
| 61.12 | Neutron determination of structures | 63.00 | LATTICE DYNAMICS AND CRYSTAL STATISTICS |
| 61.14 | Electron determination of structures | 63.20 | Phonons and vibrations in crystal lattices |
| 61.14F | <i>Experimental diffraction and scattering</i> | 63.20D | <i>Phonon states and bands, normal modes, and phonon dispersion</i> |
| 61.16 | Other determination of structures | 63.20K | <i>Phonon-electron interactions</i> |
| 61.16N | <i>EPR and NMR determinations</i> | 63.20M | <i>Phonon-defect interactions</i> |
| 61.25 | Studies of specific liquid structures | 63.20P | <i>Localised modes</i> |
| 61.25M | <i>Liquid metals</i> | 63.50 | Vibrational states in disordered systems |
| 61.40 | Amorphous and polymeric materials | 63.70 | Statistical mechanics of lattice vibrations |
| 61.50 | Crystalline state | 63.90 | Other topics in lattice dynamics and crystal statistics |
| 61.50K | <i>Crystallographic aspects of polymorphic and order-disorder transformations</i> | 64.00 | EQUATIONS OF STATE, PHASE EQUILIBRIA, AND PHASE TRANSITIONS |
| 61.55 | Specific structure of elements and alloys | 64.70 | Phase equilibria, phase transitions and critical points of specific substances |
| 61.55F | <i>Metallic elements</i> | 64.70K | <i>Solid-solid transitions</i> |
| 61.55H | <i>Alloys</i> | 64.75 | Solubility, segregation, and mixing |
| 61.60 | Specific structure: inorganic compounds | 64.90 | Other topics in equations of state, phase equilibria, and phase transitions |
| 61.70 | Defects in crystals | | |
| 61.70B | <i>Interstitials and vacancies</i> | | |
| 61.70E | <i>Other point defects</i> | | |
| 61.70G | <i>Dislocations: theory</i> | | |
| 61.70J | <i>Etch pits, decoration, transmission electron-microscopy and other direct observations of dislocations...</i> | | |
| 61.70N | <i>Grain and twin boundaries</i> | | |
| 61.70P | <i>Stacking faults, stacking fault tetrahedra, and other planar or extended defects</i> | | |
| 61.70R | <i>Crystal impurities: general</i> | | |

30.00 ATOMIC AND MOLECULAR PHYSICS

32.00 ATOMIC SPECTRA AND INTERACTIONS WITH PHOTONS

32.80 Photon interactions with atoms

32.80H Auger effect and inner-shell ionisation

Plasmon loss and plasmon gain in Mg-Cd

alloys *S A Abo-Namous, P T Andrews and*

C E Johnson F61

60.00 CONDENSED MATTER: STRUCTURE, THERMAL AND MECHANICAL PROPERTIES

61.00 STRUCTURE OF LIQUIDS AND SOLIDS; CRYSTALLOGRAPHY

61.10 X ray determination of structures

Magnetic properties and spontaneous distortion

in TbCo_2 *D Gignoux, F Givord, R Perrier*

de la Bathie and F Sayet F763

61.10D Theories of diffraction and scattering

Theory for the $L_{2,3}$ soft x ray appearance

potential spectra for the 3d transition

metals *K Nuroh* F1321

61.10F Experimental techniques

X ray finestructure study of manganese

metal *A S Vaingankar, B V Khasbhardar and*

R N Patil F2301

61.12 Neutron determination of structures

Neutron diffraction study of γ iron titanium

deuteride *P Thompson, J J Reilly,*

F Reidinger, J M Hastings and

L M Corliss FL61

Stiffness constant of strong ferromagnetic

Ni-based alloys, measurements in

NiCo —interpretation within band

models *B Hennion and M Hennion* F557

Crystal fields in TmCu_2 *K Knorr, W Gross,*

J F Olijhoek and K H J Buschow F645

Indication of an electron redistribution in the

d band of Fe alloyed with Si *F Dupré,*

G. Frollani, F Menzinger and F Sacchetti

F691

Small angle neutron scattering on liquid Ag-Ge

alloys *M-C Bellissent-Funel, M Roth and*

P Desré F987

The structure factor of liquid nickel at 1873 K

O J Eder, E Erdresser, B Kunsch,

H Stiller, M Suda and P Weinzierl F1215

Phonon dispersion relations for $\text{Pd}_{0.96}\text{Ag}_{0.04}$

single crystal *E Maliszewski, S Bednarski,*

A Czachor and J Sosnowski F2335

61.14 Electron determination of structures

61.14F Experimental diffraction and scattering

A diffraction study of a release of energy during

the annealing of aluminium *C J Martin and*

D A O'Connor F21

Electron microscope image contrast from small

dislocation loops: III. Theoretical

predictions for non-edge dislocation loops in

a BCC crystal *S M Holmes, B L Eyre,*

C A English and R C Perrin F2307

61.16 Other determination of structures

61.16D Electron microscopy determinations

Electron microscope image contrast from small

dislocation loops: III. Theoretical

predictions for non-edge dislocation loops in

a BCC crystal *S M Holmes, B L Eyre,*

C A English and R C Perrin 2307

61.16N EPR and NMR determinations

Structural and magnetic properties of

$\text{Gd}(\text{Co}_{1-x}\text{Ir}_x)_2$ *L B Chiu, P R Elliston,*

A M Stewart and K N R Taylor F955

61.25 Studies of specific liquid structures

61.25M Liquid metals

The hard-sphere model for the surface entropy

of liquid metals *T Itami and M Shimoji*

FL15

Thermal volume expansion of liquid Ti, V, Mo,

Pd, and W *U Seydel and W Kitzel* FL153

Thermodynamic properties of liquid Na-Ga

alloys *S Tamaki and N E Cusack* F403

Small angle neutron scattering on liquid Ag-Ge

alloys *M-C Bellissent-Funel, M Roth and*

P Desré F987

The thermal pressure coefficients and heat

capacities of simple liquid metals

J M Harder, M Silbert, I Yokoyama and

W H Young F1005

The structure factor of liquid nickel at 1873 K

O J Eder, E Erdresser, B Kunsch,

H Stiller, M Suda and P Weinzierl F1215

Exact solution of the mean spherical

approximation for a model liquid metal

potential: I. Method of solution

P T Cummings F1477

61.40 Amorphous and polymeric materials

A neutron-diffraction study of $\text{Fe}_{83}\text{B}_{17}$ metallic

glass *N Cowlam, M Sakata and*

H A Davies FL203

Neutron diffraction measurement of the

structure factor of a CuTi metallic glass

M Sakata, N Cowlam and H A Davies

FL235

Structure and dynamics of a two-component

metallic glass *L von Heimendahl* F161

The polyhedron and cavity analyses of a

structural model of amorphous iron

R Yamamoto and M Doyama F617

61.50 Crystalline state

61.50K Crystallographic aspects of polymorphic and order-disorder transformations

On the (1 1/2 0) superlattice reflection in

$\beta\text{-Pd}_x$ *O Blaschko, R Klemencic,*

P Weinzierl and O J Eder FL113

61.55 Specific structure of elements and alloys

61.55F Metallic elements

Energetics of the martensitic phase transition in

sodium *M J Kelly* F1921

- Anisotropic thermal expansion in the divalent HCP metals *M Hasegawa, M J Stott and W H Young* F1
- Calculation of atomic displacements near the solute atom and in the asymptotic range in dilute alkali alloys *G Solt and A P Zhernov* F1013
- 61.55H Alloys**
- Structure and dynamics of a two-component metallic glass *L von Heimendahl* F161
- End effects for a one-dimensional alloy *L Billard, P Villemain and A Chamberod* F447
- On the origin of the Hume-Rothery rules for phase stability in α and β brasses *R Evans, P Lloyd and S M Mujibur Rahman* F1939
- 61.60 Specific structure: inorganic compounds**
- Interconfiguration fluctuation of cerium in CeN as a function of temperature and pressure *G L Olcese* F569
- 61.70 Defects in crystals**
- Vacancy-scandium interaction in quenched copper *A S Berger and R W Siegel* FL67
- Positron annihilation study of vacancies in Cu-28at%Al-4at%Ni before and after martensitic transformation *H Fukushima and M Doyama* FL177
- A diffraction study of a release of energy during the annealing of aluminium *C J Martin and D A O'Connor* F21
- Measurement of the monovacancy formation enthalpy in copper *A S Berger, S T Ockers and R W Siegel* F1023
- Positron annihilation in gold between 27 K and 592 K *L C Smetskjær, M J Fluss, M K Chason, D G Legnini and R W Siegel* F1815
- On the determination of core and valence electron enhancement factors in positron annihilation studies *R P Gupta and R W Siegel* F2353
- 61.70B Interstitials and vacancies**
- Vacancy-scandium interaction in quenched copper *A S Berger and R W Siegel* FL67
- Equilibrium vacancy concentration measurements on zinc single crystals *R Balzer and H Sigvaldason* F171
- The use of long-range metallic pair potentials in computer simulations *M S Duesbery, G Jacucci and R Taylor* F413
- On H (and He) impurities in Al and Mg *M D Whitmore and J P Carbotte* F629
- Measurement of the monovacancy formation enthalpy in copper *A S Berger, S T Ockers and R W Siegel* F1023
- The calculation of vacancy formation energies in the alkali metals Li, Na and K *G Jacucci and R Taylor* F1489
- Vacancies and the electrical resistivity of potassium *J G Cook, R Taylor and M J Laubitz* F1503
- Impurity-induced vacancy clustering in cold-worked nickel *G Dlubek, O Brümmer, N Meyendorf, P Hautjärvi, A Vehanen and J Yli-Kaupilla* F1961
- 61.70E Other point defects**
- Calculation of atomic displacements near the solute atom and in the asymptotic range in dilute alkali alloys *G Solt and A P Zhernov* F1013
- Calculated energies and geometries for hydrogen impurities in Al and Mg *D S Larsen and J K Norskov* F1975
- 61.70G Dislocations: theory**
- Dislocation scattering and de Haas-van Alphen effect *E Mann* FL135
- 61.70J Etch pits; decoration, transmission electron-microscopy and other direct observations of dislocations**
- A study of the influence of a deformation on a shape of Mössbauer spectrum of iron-chromium alloys *S M Dubiel, T Wrześniewska and S Gorczyca* F949
- 61.70N Grain and twin boundaries**
- A review of twin and stacking fault energies in Al, Mg and Be *J P Simon* F425
- 61.70P Stacking faults, stacking fault tetrahedra, and other planar or extended defects**
- A review of twin and stacking fault energies in Al, Mg and Be *J P Simon* F425
- 61.70R Crystal impurities: general**
- On H (and He) impurities in Al and Mg *M D Whitmore and J P Carbotte* F629
- Calculation of atomic displacements near the solute atom and in the asymptotic range in dilute alkali alloys *G Solt and A P Zhernov* F1013
- The potential caused by an impurity in a monovalent metal *M A Ball and M S Farthing* F1223
- Perturbed angular correlation study of Pd impurity configurations neighbouring the ^{111}Cd probe atom in Cu host *I J R Baumvol, M Behar, J A H da Jornada, E R Fraga, R P Livi and F C Zawislak* F1233
- Positive muon diffusion in iron *A Yaouanc, J F Dufresne, R Longobardi, J P Pezzetti, J Chappert, O Hartmann, E Karlsson and L O Norlin* F2157
- 61.70T Doping and implantation of impurities**
- The effects of rare earth impurities on the oxidation of chromium *R A Collins, S Muhl and G Dearnaley* F1245
- Vacancy recovery in heavy ion-implanted refractory bcc metals studied by Mössbauer spectroscopy *S R Reintsema, E Verbiest, J Odeurs and H Pattyn* F1511
- 61.70Y Interaction between different crystal structure defects**
- Vacancy-scandium interaction in quenched copper *A S Berger and R W Siegel* FL67

61.80 Radiation damage and other irradiation effects**61.80F Electrons and positrons**

A positron trapping study of molybdenum irradiated with 2, 10, and 40 MeV electrons
M Eldrup, B T A McKee and A T Stewart F637

Positron annihilation and Mössbauer studies on $\text{Cu}_x\text{Zn}_{1-x}$ alloys *I Dézsi, A Balogh, J Balogh, Zs Kajcsos, D L Nagy and E Zsoldos* F999

61.80J Ions

Some properties of ion-implanted Li in Be
M S Duesbery and R Taylor FL19

Lattice location study of ^6Li implanted into Be
E N Kaufmann, R Vianden, T E Jackman, J R MacDonald and L G Haggmark FL23

Mössbauer spectroscopy of isotope separator implanted $^{119\text{m}}\text{Sn}$ in FCC metals
A Nylandsted Larsen and G Weyer F27

The effects of rare earth impurities on the oxidation of chromium *R A Collins, S Muhl and G Dearnaley* F1245

Vacancy recovery in heavy ion-implanted refractory bcc metals studied by Mössbauer spectroscopy *S R Reintsema, E Verbiest, J Odeurs and H Pattyn* F1511

62.00 MECHANICAL AND ACOUSTIC PROPERTIES OF CONDENSED MATTER**62.20 Mechanical properties of solids (related to microscopic structure)**

Effect of hydrogen on the mechanical properties of Pd *H Hasegawa and K Nakajima* F1035

62.20D Elastic constants

Pressure derivatives of the elastic moduli of bcc Ti-V-Cr, Nb-Mo and Ta-W alloys
K W Katakara, M H Manghnani and E S Fisher F773

Elastic moduli of paramagnetic chromium and Ti-V-Cr alloys *K W Katakara, M Nimalendran, M H Manghnani and E S Fisher* F2167

62.80 Ultrasonic relaxation

Nuclear acoustic resonance in palladium metal *B Ströbel, V Müller, D Schilling, K Länger and H E Bömmel* FL247

63.00 LATTICE DYNAMICS AND CRYSTAL STATISTICS**63.20 Phonons and vibrations in crystal lattices**

Anisotropic thermal expansion in the divalent HCP metals *M Hasegawa, M J Stott and W H Young* F1

A diffraction study of a release of energy during the annealing of aluminium *C J Martin and D A O'Connor* F21

Phonon dispersion relations for $\text{Pd}_{0.96}\text{Ag}_{0.04}$ single crystal *E Maliszewski, S Bednarski, A Czachor and J Sosnowski* F2335

63.20D Phonon states and bands, normal modes, and phonon dispersion

Low-energy excitations of hydrogen and deuterium in LaNi_3 *W Bühner, A Furrer, W Hülgl and L Schlappbach* FL141

The effect of hydrostatic pressure on the elastic constants of pure and hydrogenated single crystals of V and $\text{Nb}_{53}\text{Ta}_{47}$ *H L Albers, E S Fisher, K W Katakara and M H Manghnani* FL209

Crystal dynamics of Pt_3Mn at 80 K
D McK Paul, R A Cowley and B W Lucas F39

Dispersion relations for noble metals in the resonant model potential *J C Upadhyaya and L Dagens* F2177

63.20K Phonon-electron interactions

Influence of longitudinal and transverse magnetoresistivity on nuclear acoustic resonance in aluminium *V Müller, E J Unterhorst, D Maurer and G Schanz* FL11

The low-temperature lattice conductivity and phonon drag thermopower of potassium *M R Stinson, R Fletcher and C R Leavens* FL107

Electron-phonon interactions in cadmium measured by inelastic neutron scattering *A A Chernyshov, V V Pushkarev, A Yu Rumyantsev, B Dörner and R Pynn* F1983

63.20M Phonon-defect interactions

The low-temperature lattice conductivity and phonon drag thermopower of potassium *M R Stinson, R Fletcher and C R Leavens* FL107

Dislocation scattering: a new Hamiltonian for describing multivalued elastic displacement fields *R A Brown* FL241

63.20P Localised modes

Low-energy excitations of hydrogen and deuterium in LaNi_3 *W Bühner, A Furrer, W Hülgl and L Schlappbach* FL141

63.50 Vibrational states in disordered systems

Structure and dynamics of a two-component metallic glass *L von Heimendahl* F161

Influence of many-electron exchange and correlation effects on the vibrational properties of substitutional alloys
G Grünewald and R Schopohl F1047

63.70 Statistical mechanics of lattice vibrations

Anisotropic thermal expansion in the divalent HCP metals *M Hasegawa, M J Stott and W H Young* F1

63.90 Other topics in lattice dynamics and crystal statistics

Calculation of atomic displacements near the solute atom and in the asymptotic range in dilute alkali alloys *G Solt and A P Zhernov* F1013

64.00 EQUATIONS OF STATE, PHASE EQUILIBRIA AND PHASE TRANSITIONS

64.70 Phase equilibria, phase transitions, and critical points of specific substances

64.70K Solid-solid transitions

Positron annihilation study of vacancies in

Cu-28at%Al-4at%Ni before and after

martensitic transformation *H Fukushima and M Doyama* FL177

The HCP-FCC transition in pure Co investigated

by neutron scattering *F Frey, W Prandl, J Schneider, C Zeyen and K Ziebeck* F603

Magnetic susceptibilities and specific heats of Ce-Th alloys *R A Elenbaas, C J Schinkel and E Swakman* F1261

The effects of pressure and crystallinity on the hexagonal to orthorhombic transition temperature in dysprosium *R J Potton, K A Warburton and G J Keeler* F2451

64.75 Solubility, segregation, and mixing

Solubility of helium in metallic hydrogen

D J Stevenson F791

64.90 Other topics in equations of state, phase equilibria, and phase transitions

Energetics of the martensitic phase transition in sodium *M J Kelly* F1921

65.00 THERMAL PROPERTIES OF CONDENSED MATTER

65.20 Heat capacities of liquids

The thermal pressure coefficients and heat capacities of simple liquid metals

J M Harder, M Silbert, I Yokoyama and WH Young F1005

65.40 Heat capacities of solids

Thermodynamic properties of solid alloys: II.

Order-disorder transitions in Mg_3Cd and MgCd_3 *CH Leung* F179

Heat capacity and magnetisation of gold-nickel alloys *R Kuentzler and J P Kappler* F195

Low-temperature specific heat of the 'nearly ferromagnetic' amorphous alloy

$\text{Y}_{0.22}\text{Ni}_{0.78}$ *P Garoche, A Liénard, J P Rebouillat and J J Veyssié* FL129

A calorimetric investigation of the emerging ferromagnetism in AuFe alloys *D G Dawes and B R Coles* FL215

The specific heat of strained and annealed

chromium *I S Williams, E S R Gopal and R Street* F431

Crystal fields in TmCu_3 *K Knorr, W Gross, J F Olijhoek and K H J Buschow* F645

Measurements of the heat capacity of

neodymium in the range 2-10 K and zero magnetic field *EM Forgan, CM Muirhead, DW Jones and K A Gschneidner Jr* F651

Low-temperature specific heat of glassy and crystallised $\text{Pd}_{0.775}\text{Cu}_{0.06}\text{Si}_{0.165}$ alloys

J C Lasjaunias, A Ravex and D Thoulouze F803

Magnetic susceptibilities and specific heats of Ce-Th alloys *R A Elenbaas, C J Schinkel and E Swakman* F1261

Thermally excited states in cobalt and cobalt alloys *W Bendick and W Pepperhoff* F2185

Specific heat, magnetisation and stability of canted structure in GdMg and related compounds *J Pierre, A de Combarieu and R Lagnier* F1271

65.50 Thermodynamic properties and entropy

Some observations of thermodynamic and electron transport properties in expanded liquid mercury and amalgams *F E Neale, N E Cusack and R D Johnson* FL13

Volumes of mixing of liquid metals

I Yokoyama, M J Stott, M Watabe, WH Young and M Hasegawa F207

Thermodynamic properties of liquid Na-Ga alloys *S Tamaki and N E Cusack* F403

The specific heat of strained and annealed chromium *I S Williams, E S R Gopal and R Street* F431

End effects for a one-dimensional alloy

L Billard, P Villemain and A Chamberod F447

Phonon-characterisation and the theory of the temperature dependence of the electrical resistivity of amorphous metals *J Jäckle and K Froböse* F967

The electronic Grüneisen parameter for the transition metals *GC Fletcher and M Yahaya* F1529

Thermodynamic properties of a metal near a fermi surface topological transition: the anomalous electron-phonon interaction contribution *L Dagens and C Lopez-Rios* F2195

65.70 Thermal expansion and thermomechanical effects

Anisotropic thermal expansion in the divalent

HCP metals *M Hasegawa, M J Stott and WH Young* F1

Volumes of mixing of liquid metals

I Yokoyama, M J Stott, M Watabe, WH Young and M Hasegawa F207

66.00 TRANSPORT PROPERTIES OF CONDENSED MATTER (NONELECTRONIC)

66.30 Diffusion in solids

Diffusion, correlation effects and jump frequency ratios in binary substitutional solid solutions *Th Heumann* F1997

- Positive muon diffusion in iron *A Yaouanc, J F Dufresne, R Longobardi, J P Pezzetti, J Chappert, O Hartmann, E Karlsson and L O Norlin* F2157

66.30D Theory of diffusion and ionic conduction in solids

- Diffusion, correlation effects and jump frequency ratios in binary substitutional solid solutions *Th Heumann* F1997
Positive muon diffusion in iron *A Yaouanc, J F Dufresne, R Longobardi, J P Pezzetti, J Chappert, D Hartmann, E Karlsson and L O Norlin* F2157

66.30F Self-diffusion in metals, semimetals, and alloys

- Measurement of the monovacancy formation enthalpy in copper *A S Berger, S T Ockers and R W Siegel* F1023
Application of TDPAC techniques to diffusion models: diffusion mechanism of Ag in In *A R López-García, A G Bibiloni, M C Caracoche, J A Martínez, A Mendoza-Zélis, R C Mercader, A F Pasquevich and F Dymant* F1283

66.30J Diffusion, migration, and displacement of impurities

- Investigation of the hydrogen diffusion in FeTiH₂ by means of quasielastic neutron scattering *E Lebsanft, D Richter and J Töpler* F1047
The effects of rare earth impurities on the oxidation of chromium *R A Collins, S Muhl and G Dearnaley* F1245
Application of TDPAC techniques to diffusion models: diffusion mechanism of Ag in In *A R López-García, A G Bibiloni, M C Caracoche, J A Martínez, A Mendoza-Zélis, R C Mercader, A F Pasquevich and F Dymant* F1283
The calculation of electromigration forces and resistivities for liquid binary alloys *W Jones and H N Dunleavy* F1541
The diffusion of H and D in Nb and Ta at low temperatures *J Engelhard* F2217

70.00 CONDENSED MATTER: ELECTRONIC STRUCTURE, ELECTRICAL, MAGNETIC, AND OPTICAL PROPERTIES

- Critical behaviour of the electrical resistivity at the spin reorientation transition of pure gadolinium *J B Sousa, M M Amado, R P Pinto, J M Moreira, M E Braga, M Ausloos and P Clippe* FL77
Magnetoplasma waves in bismuth and semimetallic BiSb alloys in strong magnetic fields at 300 GHz *W Brayne, J Lebech and K Saermark* F223

71.00 ELECTRON STATES

71.10 General theories and computational techniques

- An expression for the integrated density of states of a liquid metal in Roth's effective-medium approximation. A generalisation of Friedel's formula *K Nizéki* FL185
Electronic structure of metals: VII. Optical absorption of simple metals *S Wang and C B So* F579
Linear augmented plane wave method for self-consistent calculations *T Takeda and J Kübler* F661
The electronic Grüneisen parameter for the transition metals *G C Fletcher and M Yahaya* F1529
The local density of states and the local environment in alloys *J E Inglesfield* F1551
Linear methods for fully relativistic energy-band calculation *T Takeda* F815

71.20 Electronic density of states determinations

- Density-functional approximation for the quasiparticle dynamics of Rb *A H MacDonald* FL99
Virtual bound states in dilute noble metal based disordered alloys according to the resonant model potential theory *L Dagens* F45
Density of electronic states in amorphous and liquid cobalt *S N Khanna, F Cyrot-Lackmann and M C Desjonquères* F79
Local density of states of a bulk Cu atom *C E van Dijkum and A Lodder* F243
Density of states and electrical conductivity of disordered alloys with strong electron correlation *K Elk, J Richter and V Christoph* F307
Band theory of nonmagnetic and magnetic iron-rhodium alloy *M A Khan* F457
Electronic structure of intermetallic compounds with CsCl structure: NMR relaxation times *B Perrin, P Descouts, A Dupanloup and D Seipier* F673
The local density of states and the local environment in alloys *J E Inglesfield* F1551
Soft x ray emission and the local densities of states in Cu-Ni alloys *P J Durham, D Ghaleb, B L Györffy, C F Hague, J-M Mariot, G M Stocks and W M Temmerman* F1719
Effects of order on the electronic structure of ferromagnetic transition metal alloys: application to FeCo and Ni₃Fe *M C Desjonquères and M Lavagna* F1733
Contribution of the conduction electrons to the crystalline electric field. I: Direct coulombic part *D Schmitt* F1745
Electronic structure of omega phase of titanium and zirconium *Y K Vohra, S K Sikka and R Chidambaram* F1771

71.25 Nonlocalised single-particle electronic states

- Single-particle Hamiltonian and self-consistency in random binary alloys *F Sacchetti* F253
 Analysis of LMT0 band results for A15 compounds by pressure calculations *T Jarlborg* F1065
 Fano effect and hyperfine field of a non-transition impurity in ferromagnetic transition metals *K Terakura* F2469

71.25C Techniques of bandstructure calculation (general theory, applications of group theory, analytic continuation, etc.)

- Simple calculation of optical absorption of Ni in the near infrared *J C Parlebas and D L Mills* F591
 Relativistic energy bands of indium by RKKRZ method *J Chowdhuri, P Chatterjee and S Chatterjee* F683
 Linear methods for fully relativistic energy-band calculation *T Takeda* F815
 The bandstructure of rhodium, its groundstate and the effects of change of volume *M Yahaya and G C Fletcher* F1295
 Application of fast self-consistent cluster calculations for large systems to the electronic structure of solids *G Ries and H Winter* F1589

71.25H Measurement of Fermi surface parameters

- Transverse electron focusing and specular reflection in silver *V S Tsoi, J Bass, P A M Benistant, H van Kempen, E L M Payens and P Wyder* FL221
 The Fermi surface of rhodium: radiofrequency size effect *T L Ruthruff and R G Goodrich* F95
 de Haas-van Alphen effect, LMT0 bandstructure and Fermi surface of β' -AuMg *A E Dunsworth, J-P Jan and H L Skriver* F261
 Electronic structure of dilute $\text{Fe}_{1-x}\text{P}_x$ alloys *M Maurer, M C Cadeville and J P Sanchez* F271
 Stress induced changes in the Fermi surface of magnesium *B R Watts and J Mayers* F831
 An analytic method for calculating stress induced changes in Fermi surfaces: II *B R Watts and L J Sundström* F849
 de Haas-van Alphen effect and LMT0 bandstructure of Al_2Cu *A E Dunsworth, J-P Jan and H L Skriver* F1077
 Magnetic field dependent phase shifts present in the measurement of quantum oscillatory effects *R Reifengerger and R W Stark* F1307
 Electron-phonon collision frequencies in aluminium; the radio frequency size effect *D Parsons and C A Steele* F1783

71.25L Electron energy states in liquid metals

- On the theory of the electrical conductivity of disordered systems in the tight-binding approximation *B Movaghar and G W Sauer* F867
 Electronic states and transport in amorphous and liquid transition metals; Fe, Co and Ni *T Fujiwara* F2011

71.25M Electron energy states in amorphous and glassy solids

- Electronic states in amorphous and liquid iron *T Fujiwara and Y Tanabe* FL73
 Single-particle Hamiltonian and self-consistency in random binary alloys *F Sacchetti* F253
 On the behaviour of the Cd d bands in Au, Ag and Hg alloys *J A Nicholson, R C G Leckey, J D Riley, J G Jenkin and J Liesegang* F393
 Electronic states in amorphous metals *T Fujiwara and Y Tanabe* F1085
 Stress-induced changes in the Fermi surface of zinc *B R Watts and J Mayers* F1565
 Electronic states and transport in amorphous and liquid transition metals; Fe, Co and Ni *T Fujiwara* F2011

71.25P Bandstructure of crystalline metals

- Local density of states of a bulk Cu atom *C E van Dijkum and A Lodder* F243
 de Haas-van Alphen effect, LMT0 bandstructure and Fermi surface of β' -AuMg *A E Dunsworth, J-P Jan and H L Skriver* F261
 Electronic structure of dilute $\text{Fe}_{1-x}\text{P}_x$ alloys *M Maurer, M C Cadeville and J P Sanchez* F271
 Self-consistent LMT0 band calculations on A15 compounds *T Jarlborg* F283
 Band theory of nonmagnetic and magnetic iron-rhodium alloy *M A Khan* F457
 The electronic structure of dilute alloys of gallium in gold *P T Coleridge* F473
 Relativistic energy bands of indium by RKKRZ method *J Chowdhuri, P Chatterjee and S Chatterjee* F683
 Stress induced changes in the Fermi surface of magnesium *B R Watts and J Mayers* F831
 An analytic method for calculating stress induced changes in Fermi surfaces: II *B R Watts and L J Sundström* F849
 de Haas-van Alphen effect and LMT0 bandstructure of Al_2Cu *A E Dunsworth, J-P Jan and H L Skriver* F1077
 Mössbauer effect study of Pd-based Heusler alloys: II. Hyperfine interactions in ferromagnets *J D Rush, C E Johnson, M F Thomas, D C Price and P J Webster* F1145
 The bandstructure of rhodium, its groundstate and the effects of change of volume *M Yahaya and G C Fletcher* F1295

- Magnetic field dependent phase shifts present in the measurement of quantum oscillatory effects *R Reifenberger and R W Stark* F1307
- Theory for the $L_{2,3}$ soft x ray appearance potential spectra for the 3d transition metals *K Nuroh* F1321
- Stress-induced changes in the Fermi surface of zinc *B R Watts and J Mayers* F1565
- Double beam photoemission of d band metals: Rh, Pd, Ir, Pt *M Wautelet, J P Delrue and L D Laude* F1579
- ^{57}Fe Mössbauer study of hexagonal phase iron alloys *D I C Pearson and J M Williams* F1797
- Thermodynamic properties of a metal near a Fermi surface topological transition: the anomalous electron-phonon interaction contribution *L Dagens and C Lopez-Rios* F2195
- Optical constants of nickel: (I) influence of temperature, (II) relation to bandstructure *M Ph Stoll and C Jung* F2491
- 71.25T Bandstructure of crystalline semiconductor compounds and insulators**
- Indication of an electron redistribution in the d band of Fe alloyed with Si *F Dupré, G Frollani, F Menzinger and F Sacchetti* F691
- 71.30 Metal-insulator transitions**
- On the theory of the electrical conductivity of disordered systems in the tight-binding approximation *B Movaghar and G W Sauer* F867
- Application of fast self-consistent cluster calculations for large systems to the electronic structure of solids *G Ries and H Winter* F1589
- Optical investigation of the solid-liquid transition in gallium *R Kofman, P Cheyssac and R Garrigos* F2345
- 71.38 Polarons and electron-phonon interactions**
- Electron-phonon collision frequencies in aluminium; the radio frequency size effect *D Parsons and C A Steele* F1783
- 71.45 Collective effects**
- Tight-binding theory of alloy heats of formation: a moments approach *C H Hodges* FL89
- Contribution of the conduction electrons to the crystalline electric field. II: Exchange coulombic part *D Schmitt* F1759
- On the origin of the Hume-Rothery rules for phase stability in α and β brasses *R Evans, P Lloyd and S M Mujibur Rahman* F1939
- 71.45G Exchange, correlation, dielectric and magnetic functions, plasmons**
- Frequency dependence of the local field factor of an electron liquid *B K Rao, S S Mandal and D N Tripathy* FL51
- Plasmon loss and plasmon gain in Mg-Cd alloys *S A Bo-Namous, P T Andrews and C E Johnson* F61
- Linear response function of a bounded jellium metal in the RPA *L M Garrido, F Flores and F García-Moliner* F1097
- Magnetic field dependent phase shifts present in the measurement of quantum oscillatory effects *R Reifenberger and R W Stark* F1307
- 71.50 Localised single-particle electronic states**
- Nuclear magnetic resonance and pressure effects in $\text{UNi}_{1-x}\text{Cu}_x$ *K H J Buschow, P R Locher and M Leger* F2483
- 71.55 Impurity and defect levels**
- Dislocation scattering: a new Hamiltonian for describing multivalued elastic displacement fields *R A Brown* FL241
- Virtual bound states in dilute copper-transition metal alloys *E M Haines* F485
- Spherical solid model for muon and hydrogen in metals *M Manninen and R M Nieminen* F1333
- Size effect in dilute alloys of transition metals *G Moraitis and F Gautier* F2025
- Fano effect and hyperfine field of a non-transition impurity in ferromagnetic transition metals *K Terakura* F2469
- 71.65 Positron states**
- Positron annihilation study of vacancies in Cu-28at%Al-4at%Ni before and after martensitic transformation *H Fukushima and M Doyama* FL177
- Positron annihilation in gold between 27 K and 592 K *L C Smedskjaer, M J Fluss, M K Chason, D G Legnini and R W Siegel* F1815
- On the determination of core and valence electron enhancement factors in positron annihilation studies *R P Gupta and R W Siegel* F2353
- Angular correlation in positron annihilation *J Arponen and E Pajanne* F2359
- 71.70 Level splitting and interactions**
- Thermally excited states in cobalt and cobalt alloys *W Bendick and W Pepperhoff* F2185
- 71.70C Crystal and ligand fields**
- Theory of screening effects on crystalline electric fields in metallic rare earth materials *J C Duthie and V Heine* F1349
- Contribution of the conduction electrons to the crystalline electric field. I: Direct coulombic part *D Schmitt* F1745
- Influence of charge transfer on the crystal field in rare-earth chalcogenides and pnictides *R A B Devine* F2107
- 71.70G Exchange interactions**
- Electronic structure of intermetallic compounds with CsCl structure: NMR relaxation times *B Perrin, P Descouts, A Dupanloup and D Seipier* F673
- Contribution of the conduction electrons to the crystalline electric field. II: Exchange coulombic part *D Schmitt* F1759

71.70J Nuclear states and interactions

On the temperature dependence and magnitude of the electric field gradient in noncubic metals *K W Lodge* F2035

72.00 ELECTRONIC TRANSPORT IN CONDENSED MATTER

Electrical resistance anomalies of highly resistive crystalline alloys *R Cywinski* FL29

Critical behaviour of the electrical resistivity at the spin reorientation transition of pure gadolinium *J B Sousa, M M Amado, R P Pinto, J M Moreira, M E Braga, M Ausloos and P Clippe* FL77

72.10 Theory of electronic transport; scattering mechanisms

Electron-electron scattering effects in metals *C Potter and G J Morgan* F493

Approximate expressions for the product of the resistivity with its TCR in very thin polycrystalline films *C R Tellier, C R Pichard and A J Tosser* F2377

72.15 Electronic conduction in metals and alloys

Remanent superconductivity in pure bulk aluminium *R M Boysel, R S Newrock and J C Garland* FL191

Density of states and electrical conductivity of disordered alloys with strong electron correlation *K Elk, J Richter and V Christoph* F307

On the theory of the electrical conductivity of disordered systems in the tight-binding approximation *B Movaghar and G W Sauer* F867

Phonon-characterisation and the theory of the temperature dependence of the electrical resistivity of amorphous metals *J Jäckle and K Froböse* F967

Critical region of a type II superconducting film near H_{c2} : rational approximants *G J Ruggeri* F1861

72.15C Electrical and thermal conduction in amorphous and liquid metals and alloys

Some observations of thermodynamic and electron transport properties in expanded liquid mercury and amalgams *F E Neale, N E Cusack and R D Johnson* F113

Hall resistivity of a two-phase magnetic material—crystallised Metglas 2826 *R Malmhäll, G Bäckström, S M Bhagat and K V Rao* F317

Calculation of the electrical resistivity of liquid rare earths: I. The divalent elements Eu, Yb *B Delley, H Beck, D Trautmann and F Rösel* F505

Calculation of the electrical resistivity of liquid rare earths: II. Trivalent elements *B Delley and H Beck* F517

Long-range order and the electrical resistivity *P L Rossiter* F891

The calculation of electromigration forces and resistivities for liquid binary alloys *W Jones and H N Dunleavy* F1541

Electrical and magnetic properties of the FeTi alloy near the order-disorder transition *A Paja and K Kulakowski* F1613

Charge transfer and transport properties of binary alloys in the tight-binding model *K Hoshino* F1619

Electrical resistivity of amorphous alloy films: SnAu *E Blasberg, D Korn and H Pfeifle* F1821

Electronic states and transport in amorphous and liquid transition metals; Fe, Co and Ni *T Fujiwara* F2011

Electronic properties of high-purity liquid calcium and strontium *C Rottman and J B Van Zytveld* F2049

Calculation of the electrical resistivity of liquid rare earths: III. Spin disorder contribution for Gd *B Delley and H Beck* F2231

72.15E Electrical and thermal conduction in crystalline metals and alloys

The low-temperature lattice conductivity and phonon drag thermopower of potassium *M-R Stinson, R Fletcher and C R Leavens* FL107

Further evidence for electron-electron scattering in aluminium *J H J M Ribot, J Bass, H van Kempen and P Wyder* FL117

Measurement of the pressure dependence of the electron-phonon interaction in aluminum *B Sundqvist and Ö Rapp* PL161

Validity of empirical expressions for the low-temperature electrical resistivity *M Kaveh, C R Leavens and N Wiser* F71

The electronic structure of dilute alloys of gallium in gold *P T Coleridge* F473

Electron-electron scattering effects in metals *C Potter and G J Morgan* F493

Vacancies and the electrical resistivity of potassium *J G Cook, R Taylor and M J Laubitz* F1503

Electrical and magnetic properties of the FeTi alloy near the order-disorder transition *A Paja and K Kulakowski* F1613

Ohm's law violation in spin glasses *A A Lisyanski and G I Trush* F1629

Anomalous resistivity associated with conduction-electron scattering from Cr impurities in Pt *R M Roshko and G Williams* F2057

Thermally excited states in cobalt and cobalt alloys *W Bendick and W Pepperhoff* F2185

Low-temperature transport properties of Pd-H alloys in a heterogeneous-mixture model *C L Foiles* F2381

The low-temperature thermoelectric properties of tin-doped bismuth *J Boxus, J Heremans, J-P Michenaud and J-P Issi* F2387

Thermopower of tin-doped bismuth from 50 mK to 25 K *C Uher* F2399

72.15G Galvanomagnetic and other magnetotransport effects

- Low-temperature resistivity of silver
M Khoshnevisan, W P Pratt Jr, P A Schroeder, S Steenwyk and C Uher FL1
- Charge transfer and transport properties of binary alloys in the tight-binding model
K Hoshino F1619

- The effect of impurities on the magnetic susceptibility of monovalent metals: II. Fermi surface effects *M A Ball and M S Farthing* F1883

75.20 Diamagnetism and paramagnetism

- Copper-iron alloys: iron moment and lattice distortion *J R Davis and T J Hicks* FL7
- Orbital magnetic susceptibilities of vanadium and iron *M Yasui and M Shimizu* FL227
- A numerical calculation of the orbital magnetic susceptibility for bcc 3d series transition metals *M Yasui and M Shimizu* F1653
- Magnetic properties of Fe₂Sn₂: III. A ¹¹⁹Sn Mössbauer study *G Le Caer, B Malaman, L Häggström and T Ericsson* F1905

75.20E Metals and alloys

The pressure dependence of the hyperfine field at tin dissolved in cobalt *A E Balabanov and T E Cranshaw* FL173

Magnetic properties of AuCo solid solutions and frequency dependent susceptibility maximum *D Korn, D Schilling and G Zibold* F1111

Specific heat, magnetisation and stability of canted structure in GdMg and related compounds *J Pierre, A de Combarieu and R Lagnier* F1271

Characteristic magnetovolume effects in Invar type Fe-Pt alloys *K Sumiyama, M Shiga, M Morioka and Y Nakamura* F1665

Influence of charge transfer on the crystal field in rare-earth chalcogenides and pnictides *R A B Devine* F2107

Effective exchange interaction for rare earths in metals *A Traper, O L T de Menezes and A A Gomes* F2457

75.20H Local moment in dilute alloys: Kondo effect

The Kondo effect in highly concentrated magnetic alloys *K Hoshino and Y Kurata* F131

NMR evidences for Kondo deviations of the Mn electron spin relaxation and g factor in CuMn *H Alloul, F Hippert and H Ishii* F725

Magnetic susceptibilities and specific heats of Ce-Th alloys *R A Elenbaas, C J Schinkel and E Swakman* F1261

Field-dependent susceptibility of a spin glass *M Simpson* F1377

Ohm's law violation in spin glasses *A A Lisianskii and G I Trush* F1629

Magnetic intermediate valence behaviour in the series $(\text{Ce}_{1-x}\text{La}_x)\text{Be}_{13}$ *J P Kappler and A Meyer* F143

Spin glasses: pressure and concentration dependences of the resistivity of Au(Cr) *J Willer, J Crone and E Lüscher* F2411

75.25 Spin arrangements in magnetically ordered materials (neutron studies, etc.)

Copper-iron alloys: iron moment and lattice distortion *J R Davis and T J Hicks* FL7

On the apparent spin wave stiffness of amorphous ferromagnets *M A Continentino and N Rivier* FL145

Magnetic order and coupling in Heusler alloys $\text{Au}_2(\text{Mn}, \text{Zn})$ *J S Plant* F545

Neutron diffraction studies of atomic and magnetic order in γ Mn alloys *N Cowlam, G E Bacon, L Gillott, G R Harmer and A G Self* F1387

Polarised neutron study of TbCo_2 *D Gignoux and F Givord* F1409

Neutron study of the magnetic correlations in amorphous ErCo_2 : I. Evidence for correlations between local easy-magnetisation directions using neutron polarisation analysis *B Boucher, A Lienard, J P Rebouillat and J Schweizer* F1421

Neutron study of the magnetic correlations in amorphous ErCo_2 : II. Evidence for two different regimes in small-angle neutron scattering *B Boucher, A Lienard, J P Rebouillat and J Schweizer* F1433

Low-field susceptibility of PtFe alloys *J C Ododo* F1441

Inelastic neutron scattering measurements on incommensurate antiferromagnetic chromium *K R A Ziebeck and J G Booth* F2423

The non-collinear component in the magnetic structure of Mn_2N *D Fruchart, D Givord, P Convert, P l'Héritier and J P Sénateur* F2431

Magnetic excitations in Pt_3Mn *D M K Paul and W G Stirling* F2439

75.30 Magnetically ordered materials, other intrinsic properties

On the spin-wave theory of an amorphous asperomagnetic alloy *T Kaneyoshi* FL37

Magnetic intermediate valence behaviour in the series $(\text{Ce}, \text{La}_{1-x})\text{Be}_{13}$ *J P Kappler and A Meyer* F143

Magnetic order and coupling in Heusler alloys $\text{Au}_2(\text{Mn}, \text{Zn})$ *J S Plant* F545

Magnetic properties and spontaneous distortion in TbCo_2 *D Gignoux, F Givord, R Perrier de la Bathie and F Sayetat* F763

Characteristic magnetovolume effects in Invar type Fe-Pt alloys *K Sumiyama, M Shiga, M Morioka and Y Nakamura* F1665

75.30C Saturation moments and magnetic susceptibility

On the magnetic behaviour of $\text{Y}(\text{Fe}, \text{Al}_{1-x})_2$ alloys *E Burzo, R Baican and P Armas* FL47

Heat capacity and magnetisation of gold-nickel alloys *R Kuentzler and J P Kappler* F195

On the magnetic properties of $\text{Gd}(\text{Fe}_{1-x}\text{Al}_x)_2$ compounds *M J Besnus, A Herr and G Fischer* F745

Magnetic susceptibility of AuFe alloy films *G Zibold* F917

Polarised neutron study of TbCo_2 *D Gignoux and F Givord* F1409

Low-field susceptibility of PtFe alloys *J C Ododo* F1441

The effect of impurities on the magnetic susceptibility of monovalent metals: I. The free-electron gas model *M A Ball and M S Farthing* F1877

The effect of impurities on the magnetic susceptibility of monovalent metals: II. Fermi surface effects *M A Ball and M S Farthing* F1883

Magnetic properties and Mössbauer effects of $\text{Zr}(\text{Fe}_{1-x}\text{Co}_x)_2$ *Y Muraoka, M Shiga and Y Nakamura* F1889

75.30D Spin waves

The coexistence of spin density wave ordering and spin glass ordering in chromium alloys containing iron *J O Strom-Olsen, D F Wilford, S K Burke and B D Rainford* FL95

Dynamic magnetic susceptibility of a binary ordered ferromagnetic alloy. Application to spin wave stiffness constant of FeRh *R Riedinger, M C Mokrani, H Dreyse and M A Khan* F337

Stiffness constant of strong ferromagnetic Ni-based alloys, measurements in NiCo—interpretation within band models *B Hennion and M Hennion* F557

Spin waves in amorphous ferromagnets with random anisotropy axes *I Ya Korenblit and E F Shender* F2245

Magnetic excitations in Pt₃Mn *D M K Paul and W G Stirling* F2439

75.30G Anisotropy

On the origin of the large magnetic anisotropy of rare earth-cobalt compounds *B Szpunar and P A Lindgård* FL55

Neutron study of the magnetic correlations in amorphous ErCo₂: I. Evidence for correlations between local easy-magnetisation directions using neutron polarisation analysis *B Boucher, A Liénard, J P Rebouillat and J Schweizer* F1421

Neutron study of the magnetic correlations in amorphous ErCo₂: II. Evidence for two different regimes in small-angle neutron scattering *B Boucher, A Liénard, J P Rebouillat and J Schweizer* F1433

Spin waves in amorphous ferromagnets with random anisotropy axes *I Ya Korenblit and E F Shender* F2245

75.30H Magnetic impurity interactions

Electronic structure of intermetallic compounds with CsCl structure: NMR relaxation times *B Perrin, P Descouts, A Dupanloup and D Seipler* F673

Effective exchange interaction for rare earths in metals *A Troper, O L T de Menezes and A A Gomes* F2457

75.30K Magnetic phase boundaries

The effects of pressure and crystallinity on the hexagonal to orthorhombic transition temperature in dysprosium *R J Potton, K A Warburton and G J Keeler* F2451

75.40 Critical-point effects, specific heats, short-range order

The Néel temperature of the Cr-Ga alloy system in the dilute concentration range *K Fukamichi* FL85

The alternating magnetisation of 16.7 at% CuMn *E M Gray* FL167

A calorimetric investigation of the emerging ferromagnetism in AuFe alloys *D G Dawes and B R Coles* FL215

Interconfiguration fluctuation of cerium in CeN as a function of temperature and pressure *G L Olcese* F569

Magnetic properties of AuCo solid solutions and frequency dependent susceptibility maximum *D Korn, D Schilling and G Zibold* F1111

Internal field distributions in model spin glasses *R G Palmer and C M Pond* F1451

75.50 Studies of specific magnetic materials

Magnetic properties and Mössbauer effects of Zr(Fe_{1-x}Co_x)₂ *Y Muraoka, M Shiga and Y Nakamura* F1889

Effect of ultrasonic pulses on the magnetisation of ferromagnetic precipitates in bismuth rich Bi-Mn *K Schröder and D Öngüntü* F2115

75.50B Ferromagnetism of Fe and its alloys

Effects of order on the electronic structure of ferromagnetic transition metal alloys: application to FeCo and Ni₃Fe

M C Desjonquères and M Lavagna F1733

⁵⁷Fe Mössbauer study of hexagonal phase iron alloys *F1797*

75.50C Ferromagnetism of other metals

Basis of the Landau-Ginzburg theory for inhomogeneous ferromagnetic systems *D Wagner and E P Wohlfarth* F717

AC susceptibility and temperature modulation studies of gadolinium *G H J Wentenaar, S J Campbell, D H Chaplin, T J McKenna and G V H Wilson* F935

Mössbauer effect study of Pd-based Heusler alloys: I. Magnetic coupling *J D Rush, C E Johnson, M F Thomas, D C Price and P J Webster* F1129

Mössbauer effect study of Pd-based Heusler alloys: II. Hyperfine interactions in ferromagnets *J D Rush, C E Johnson, M F Thomas, D C Price and P J Webster* F1145

Environmental effects and magnetic moment distribution in nickel-rich Ni-Ru alloys *G Parette and F Kajzar* F1867

75.50K Amorphous magnetic materials

Low-temperature specific heat of the 'nearly ferromagnetic' amorphous alloy Y_{0.22}Ni_{0.78} *P Garoche, A Liénard, J P Rebouillat and J J Veyssié* FL129

On the apparent spin wave stiffness of amorphous ferromagnets *M A Continentino and N Rivier* FL145

Magnetic after-effect in the bulk amorphous alloy Tb₅₂Ag₄₈ *B Boucher and B Barbara* FL151

Magnetic and transport properties of nickel-rare earth amorphous alloys *R Asomoza, I A Campbell, A Fert, A Liénard and J P Rebouillat* F349

Spin correlations in a spin glass *J R Davis and T J Hicks* F753

- Magnetisation and magnetoresistance of PdCr spin glasses *R W Cochrane, J O Ström-Olsen and G Williams* F1165
- Neutron study of the magnetic correlations in amorphous ErCo_2 : I. Evidence for correlations between local easy-magnetisation directions using neutron polarisation analysis *B Boucher, A Liénard, J P Rebouillat and J Schweizer* F1421
- Neutron study of the magnetic correlations in amorphous ErCo_2 : II. Evidence for two different regimes in small-angle neutron scattering *B Boucher, A Liénard, J P Rebouillat and J Schweizer* F1433
